A CONCEPTUAL APPROACH FROM ELECTRON TO ELECTRONICS—DIODE TO TRANSISTOR—TRANSISTOR TO LOGIC GATES—LOGIC GATES TO MICROPROCESSOR

SALIENT FEATURES

• The book is meant for students pursuing a beginners' course in electronics. Current syllabi of basic electronics include those in Physics (Honours), Diploma, B.Tech., BCA, the curricula of different universities, and those offered in various engineering and technical institutions.

• This book will provide a practical approach to the basics of electronics to the students at the senior secondary level in classes XI (Level 3) and XII (Level 4) in their vocational courses. As we know, any advanced technology is basically dependent on basic concepts. It is as per the motive of National Education Policy-2020 (NEP-2020), the Government of India for skilling India, and boosts the youth towards Make in India, the dream of our nation.

• This book will also help those who are going for 14+ skill/vocational/PMKVY courses in the electronics sector and have no science background. The ESDM (Electronics System Design and Manufacturing) sector focuses on students and unemployed youth at 9–10th standard onwards, ITI, diploma, non-engineering graduates, etc., to increase their employability to work in 'Manufacturing' and 'Service Support' functions for skill development in the ESDM sector.

This book is authored by 27+ years of experience as an entrepreneur, the CEO/FOUNDER/PRESIDENT of the Indian Institute of Computer Technology (IICT), Graminfotech Pvt. Ltd., and the Society for Computer Educational Research. He has a doctorate degree in physics with various international publications and workshops and has some professional certifications in IT services like training, development, and consultancy. Author of 4 Books in Electronics, Computer Peripherals—Part I, Computer Peripherals—Part II, and Computer Networking—Do it yourself.
